

One call can bring peace of mind.

American Indian and Alaska Native (AI/AN) health care clinics provide many of the health services that are necessary to keep your children healthy. Your State's children's health insurance program may provide services that your AI/AN health care clinic does not cover. By enrolling in a children's health insurance program, you benefit your tribal community and tribal clinic by maximizing health care resources.

Children's health insurance covers urgent health care needs and more:

- Regular Check-ups
- Dental Care
- Prescription Drugs
- Immunizations

Even if you've been turned down in the past, or don't think you qualify, please contact your AI/AN health care provider for more information.
